## MYLAPORE CENTER INAUGURATION

### WE'RE GROWING...!!!

This Independence Day, we're happy to announce that we have started a new centre in Mylapore, Chennai. This is our sixth centre. You can check out the inauguration pictures [here](#).

### TEACHER TRAINING

As part of the government's training program, our founder Dr. A. Ravishankar was invited to various schools to conduct training sessions for over a thousand teachers. We took this opportunity to introduce some of our teaching methods to the teachers. Some of our teaching methods like our approach for teaching algebra were well received and appreciated by the teachers. We wish to reach more children and teachers this year!

# SCHOOL PROGRAM EXPANSION

This year our very enthusiastic school program team has been working very hard to collaborate and work with schools (govt., govt. aided, and Pvt.) in and around Chennai. Chudar is now working with 15 schools and 3 private schools and reaching up to 2000 children.

We have successfully completed the initial evaluation in all the schools and have started giving the "Chudar School kit" in all the schools.

## CHUDAR SCHOOL KITS

Speaking of the Chudar Kit, our content team has been hard at work developing learning material (in a perfect package, which will be easier to deliver among teachers). This content is specifically designed to cater to the students' skill level, which was previously evaluated.

## TAMILARASI & KALAI ARASI

STD: 6 & 7th

School: Rani Lady Meyyammai Primary School

Chudar Center: Mylapore

Aspiration: To be a doctor and teacher

Favorite Part of Chudar: Learning through games

The sisters who joined our newest center in mylapore center have a very interesting story to share! the duo (Tamil wants to become a doctor and Kalai wants to become a teacher) say that they don't want to go to abroad for work when they grow up, instead they want to stay in India and provide good education and health care for their fellow country people, those- like their parents- who struggle in poverty!

They are overjoyed to join our center as they get to learn new things every day.

We wish to reach out more children like Tamil and Kalai who will shoulder the future of our nation!

Wanting to work in India instead of going abroad, where they may have better prospects, is a thought that we should cherish and nurture. Help us reach more such children by supporting our initiative.
